Authorization for this examiner's amendment was given in a telephone interview with Joe Herndon on July 7th, 2006.

In claim 16, line 5, the phrase "the ultra high-speed transceiver" has been amended to read --an ultra high-speed transceiver--.

In the specification, in the "Brief Description of the Drawings" section on page 7, in line 9, the word "receive" has been changed to --transmit--.

Allowable Subject Matter

6. Claims 1, 3-8, 16-19 and 20-23 allowed.
7. The following is a statement of reasons for the indication of allowable subject matter:
8. In regards to claim 1, prior art of record does not teach the following:

An ultra high-speed transceiver having an analog-to-digital converter for sampling a high frequency RF analog signal without shifting the frequency spectrum of the signal and a transmit/receive switch that receives a separate high frequency RF analog signal from an air interface, the separate RF analog signal having a separate frequency spectrum.

A band pass filter in a RF processing module that rejects the separate analog signal and a shifting module that shifts the separate spectrum to a shifted separate spectrum.

In regards to claim 16, the prior art of record does not teach sampling a high frequency RF analog signal, the analog signal being sampled by an analog-to-digital converter of an ultra high-speed transceiver without the spectrum being shifted in frequency.

In regards to claim 20, the prior art of record does not teach making a determination of an analog transmission protocol for a high frequency RF analog signal to be transmitted by a base station, the analog transmission protocol being identified by a pattern of bits in a digital signal.
